SKILLS

- **Languages:** C++, JavaScript
- **Frameworks/Libraries:** HTML, CSS, React, Express.js, Three.js, Cannon.js
- **Backend/Databases:** Node js, MongoDB, MySQL
- **Tools/Platforms:** Docker, Jenkins, Nagios, Terraform, AWS, Git, Github, Chrome DevTools
- **Technical Skills:** Full Stack Web Development, DevOps, DBMS, OOP's, DSA
- **Soft Skills:** Problem-Solving Skills, Teamwork, Adaptability

EXPERIENCE

- Sagar Defence Engineering (Pune) [Link]**

March 2026| Present
- Software Developer Intern*
 - Developed a **real-time drone simulation system** using React.js, Three.js, and Cannon.js, implementing physics-based movement and 3D visualization.
 - Designed and integrated **GLSL shaders** to enhance rendering quality, lighting effects, and overall simulation realism.
 - **Tech stack:** React js, Three js, Cannon js, Node js, MySQL
- Learn Fusion (Lucknow) [Link]**

September 2024
- Web Development Intern*
 - Built and optimized user-friendly websites, ensuring responsive design, and implementing interactive features to enhance user experience.
 - Led debugging, performance tuning, and API optimization, ensuring efficient data handling, reduced response latency, and stable integration across the product.
 - **Tech stack:** HTML,CSS, MERN Stack

PROJECTS

- Eclipse-Project [Link]**

September 2025
- Developed a complete Appium + TestNG automation framework using Maven for the Sauce Labs *MyDemoAppRN* Android application, including emulator boot automation, driver setup, and APK installation.
 - Designed and executed automated mobile test scripts covering app launch, login flow, UI interactions, and validation using XPath and accessibility IDs.
 - **Tech Stack:** Java, Appium, TestNG, Maven, Android Emulator, UIAutomator2
- Mern-chat-app [Link]**

March 2025
- Developed a full-stack real-time chat application using React, Node.js, Express, MongoDB, and Socket.IO
 - Implemented secure user authentication and session management using JWT, cookies and RESTful API architecture. Designed a responsive and customizable UI with Tailwind CSS and Daisy UI. Containerized backend and frontend for CI-CD pipelines using Jenkins and GitHub actions
 - **Tech Stack:** React, Node.js, Express, MongoDB, Socket.IO, JWT, Tailwind CSS, Cloudinary, Docker
- Healthcare-Backend-API [Link]**

February 2025
- Developed a secure RESTful API for a healthcare application using Node.js and Express.js, enabling management of patients, doctors, and doctor-patient mappings to streamline administrative tasks.
 - Implemented secure user authentication and session management using JWT, cookies, and RESTful API architecture. Designed and integrated PostgreSQL database schemas. Created modular routes and controllers for CRUD operations
 - **Tech Stack:** Node.js, Express.js, PostgreSQL, JWT Authentication, RESTful APIs, Postman

CERTIFICATIONS & CERTIFICATES

- Cloud Computing (NPTEL-IIT Kharagpur) [Link]

April 2025
- Devops Engineering: Planning to Production(GFG) [Link]

August 2024
- Data Structure and Algorithm (Udemy) [Link]

November 2023
- C++: basic to advance (Udemy) [Link]

September 2023

ACHIEVEMENTS

- Represented University at AIU (All India University) in Quiz Competition
Showcased Exceptional Academic prowess and quick recall ability on a national stage

January 2024
- Won the Inter-University Quiz [Link]

April 2023
- Certificate of solving 289 questions on CodeChef [Current Rating 1100+] [Link]

November 2023

EDUCATION

- Lovely Professional University**
Bachelor of Technology - Computer Science and Engineering; CGPA: 7.1

Phagwara, Punjab
Since August 2022
- Bhavans JR College**
Intermediate; Percentage: 65%

Secunderabad, Telangana
April 2020-March 2021
- Bhavans Shri Ramakrishna Vidyalaya**
Matriculation; Percentage: 77%

Secunderabad, Telangana
April 2018-March 2019
